

It's Only Grout.... Really?

BASF Precision Grout Training Seminar

Eligible for 1 PDH for Professional Engineers

Program Description

BASF, Calumet Lumber, DLZ and the Construction Advancement Foundation are joining forces to bring you an educational training seminar on proper Precision Grouting of critical rotating and dynamic equipment. Grout should not be considered just a flowable material afterthought. This seminar will help you better understand cementitious, hybrid, and epoxy grout technologies along with installation techniques for the different products. The seminar will include a classroom session (1 PDH credit) and a hands-on portion. We are going to demonstrate the proper mixing and placement procedures for these products, including how to pump epoxy grout effectively. To help improve your organizations quality control, DLZ is going to demonstrate how to properly cast and test grout specimens for these different technologies. Breakfast and lunch will be provided.

Learning Objectives:

- Importance of Precision Grout
- Precision Grouting Fundamentals
- Physical Properties & Testing of Precision Grout
- Precision Grout Design Considerations & Placement
- Open Skid Grouting
- Hands-on – including learning how to pump epoxy grout

Class Details & Registration Information:

Instructor: Dan Termunde, BASF Construction Chemicals

Date: Thursday, February 28, 2019

Time: 8:00 a.m. - 12:00 p.m.

Cost: Free (Breakfast and Lunch will be provided)

Location: Construction Advancement Foundation
6050 Southport Road, Suite A
Portage, IN 46368
