

Every Dollar Counts Cost Control for Contractors

Designed for Project Managers,
Superintendents, Project Engineers,
Lead Forepersons

Develop the talent you already have and increase productivity across the organization!

Participants in this course will learn how to identify different types of cost in a project and how each can be managed to add to the bottom line. The participants will see how labor, material, equipment and subcontractor costs affect the profitability of a project and they will learn how to identify the risks associated with a project. The participants will participate in interactive exercises to review and analyze job cost reports and make business decisions using information. The participants will learn an effective and efficient method to identify the key cost and profit movers for a project and how to manage them for improved profitability.

Learning Objectives

- Learn how to be cost aware
- Learn where cost is – AND where it is hidden
- Learn what opportunity margin is and how to identify it
- Learn a method to analyze a cost report and quickly identify outliers and margin opportunity
- Learn a method to calculate the net effect to your project
