

# Building a Successful Team for a Complicated Project

Designed for Project Engineers  
up to Project Executive Level

**Individuals Don't Build Great Companies, Teams Do!**

In construction we are often thrust onto teams that we had little to no influence picking the team. We are forced to deliver a successful project often relying on others who might not even have a contractual relationship – architects, engineers, etc... With tight margins and schedules we do not have time to fool around with poor communication and dragging team members along. This presentation will focus on how to best set the stage for kicking off a challenging project and ensuring success for all team members. Best practices will be transferable to any team. This CAF Workshop is designed for anyone who has to take charge of a multi-disciplinary/company team (contractor, subcontractors, client, architect, engineer, etc.) and drive results.

## LEARNING OBJECTIVES

- Recognize the key components for a successful construction team
- Understanding the dysfunctions of a team
- Best practices on how to start a new team on the “right foot”
- Best practices for team communication

## REGISTRATION INFORMATION

**Presenter:** Brad Benhart, Purdue University  
**Date:** Friday, March 6, 2020  
**Time:** 8:00 a.m. – 11:30 a.m.  
**Cost:** \$100 (Breakfast Included)  
**Location:** Construction Advancement Foundation  
6050 Southport Road, Suite A  
Portage, IN 46368  
Phone: (219) 764-2883

**Register Online by: March 4th, 2020**
