

# CAF & DSV Construction Law Series

## Design and Construction Defects

### A Multi-Part Series on Legal Concepts for Construction Contractors

Defects in design and construction are common. Defects range from mundane or aesthetic defects, to very serious defects that affect the performance of a structure and cause severe economic impacts, to defects that cause catastrophic collapses with tragic results. Regardless of whether a defect is major or minor in nature, a problem remains: defects typically aren't discovered until long after completion of the work, and defending against defect claims is a tall (and expensive) task.

This CAF Professional Development course will help you understand the risks involved in both design and construction and will provide some guidance on how to mitigate some of the most common types of risk.

**Who Should Attend?** Executive Management, Project Managers, Assistant PM's, Field Supervision, Project Engineers, Management, Estimators, Procurement Managers.

### Learning Objectives

- Quality Control Steps to Reduce Construction Defect Risk
- Risks Associated with Contractor Designs and Collaborative Design Teams
- Liability for Damages Resulting from Faulty Plans and Specifications Provided by Project Owners or Engineers
- Legal Liability for Construction Defects
- Warranty obligations in Construction Contracts

### Registration Information

**Presenter:** Patrick A. Drewry  
Partner at Drewry Simmons Vornehm Law LLP

**Date:** Thursday, May 13, 2021

**Time:** 8:00 a.m. -10:00 a.m. (Central Time)

**Investment:** \$25 per person

**Location:** Online Course - Link will be to all registrants 24 hours prior to class start time.

**Register Online by: May 11th, 2021**
