

Building a Successful Team for a Complicated Project

Learn how to Assemble a Team that Cohesively Works Together Towards a Common Goal

Elective Course for the Construction Management Certificate Program (CMC)

A FLEXIBLE PROFESSIONAL DEVELOPMENT PROGRAM DESIGNED FOR FIELD AND OFFICE LEADERS IN THE CONSTRUCTION INDUSTRY

COURSE OVERVIEW

In construction, effective teamwork is crucial to delivering successful projects, especially when working with diverse, multi-disciplinary teams that you didn't select. With architects, engineers, contractors, and subcontractors often working together without direct contractual relationships, strong team dynamics are essential for overcoming communication challenges and meeting tight project timelines and budgets. The ability to quickly build a cohesive team that communicates well and works toward common goals is vital to the success of any complex construction project.

This CMC workshop focuses on setting the foundation for leading challenging projects, ensuring all team members—regardless of their roles—are aligned and working effectively together. Participants will learn best practices for kicking off projects, building trust among team members, and fostering a collaborative environment that drives results. Whether managing contractors, clients, architects, or engineers, the techniques taught in this workshop are designed to be transferable across any construction team.

LEARNING OBJECTIVES

- Identify the key components of a successful construction team.
- Understand common team dysfunctions and how to address them.
- Learn best practices for starting a new team on the right foot.
- Implement effective communication strategies for optimal team performance.
