

Risk Management in Construction Operations

Learn the Major Risks Associated with Construction Projects and How to Avoid Them!

Elective Course for the Construction Management Certificate Program (CMC)

A FLEXIBLE PROFESSIONAL DEVELOPMENT PROGRAM DESIGNED FOR FIELD AND OFFICE LEADERS IN THE CONSTRUCTION INDUSTRY

COURSE OVERVIEW

Project Managers, Project Engineers, and Superintendents are often buried in the everyday management of the projects and may take contracts, subcontracts, and purchase orders for granted. “I leave all the legal mumbo jumbo for the lawyers” is a common refrain from job staff. Is this wise and prudent? As contracts continue to expand it is ever important to have well-defined scopes of work and an awareness of risk allocation. This presentation will focus on some of the known and unknown items every PM and superintendent should be aware of on the job, including indemnification, additional insured, and liquidated damages. This presentation will be in basic construction-speak, not legalese.

LEARNING OBJECTIVES

- Identify the top 12 items to help manage risk
- Understanding staffing decisions related to risk
- Recognizing key schedule terms that relate to risk
- Translate basic contract clauses related to risk
- Understanding how scope items can help reduce risk

COURSE DETAILS & REGISTRATION INFORMATION

Date: Friday, March 27, 2026
Time: 8:00 a.m. – 12:00 p.m.
Cost: \$200 (Breakfast Included)
Instructor: Brad Benhart, MBA, LEED AP

Location: Construction Advancement Foundation
6050 Southport Road, Suite A
Portage, IN 46368
